

Do I need to answer all questions in one sitting?

You may answer all questions in one sitting. Depending on how many illnesses you have it may take from 30 minutes to 2 hours to answer all the questions and get your report. You will need more time to answer questions if say you have diabetes with high blood pressure and had a heart attack in the past compared to if you have asthma only. Remember there are no shortcuts when it comes to your health. If you take shortcuts for your health you may face consequences of poor health.
